Dear Mr. Jaffe,

I am in complete agreement and support the petition to ban the forced molting of layer hens (docket 98P-0203/CP).

Your serious attention to pass this proposal in necessary and is honestly appreciated. How would we, people, like being the inferior being and this abusive actions were occurring to us! I do not have to elaborate or paint a visual picture of the extreme stomach turning abuse which I am certain you have exposed to in the past.

Thank you again for taking the time to read my letter.
